**REAL-TIME NBA TOURNAMENTS BETTING LOGO
SEGMENTATION AND MASKING MODULE**

EVEMASK

Evemask is a system that utilizes AI (Artificial Intelligence) to detect, segment, and automatically mask betting logos appearing during NBA tournaments. This solution is designed to help Vietnamese broadcasters comply with strict regulations that prohibit gambling advertisements, while also maintaining a smooth and high-quality viewing experience for audiences. Evemask eliminates the burden of manual censorship, offering a balanced approach between legal compliance and broadcast content quality.

Quảng cáo cờ bạc, cá độ không được phép xuất hiện trên sóng truyền hình

Doanh nghiệp, đài phát thanh truyền hình cung cấp dịch vụ phát sóng giải bóng đá tại Việt Nam không được để tái diễn tình trạng xuất hiện quảng cáo cờ bạc, cá độ.

Nguồn: abei.gov.vn

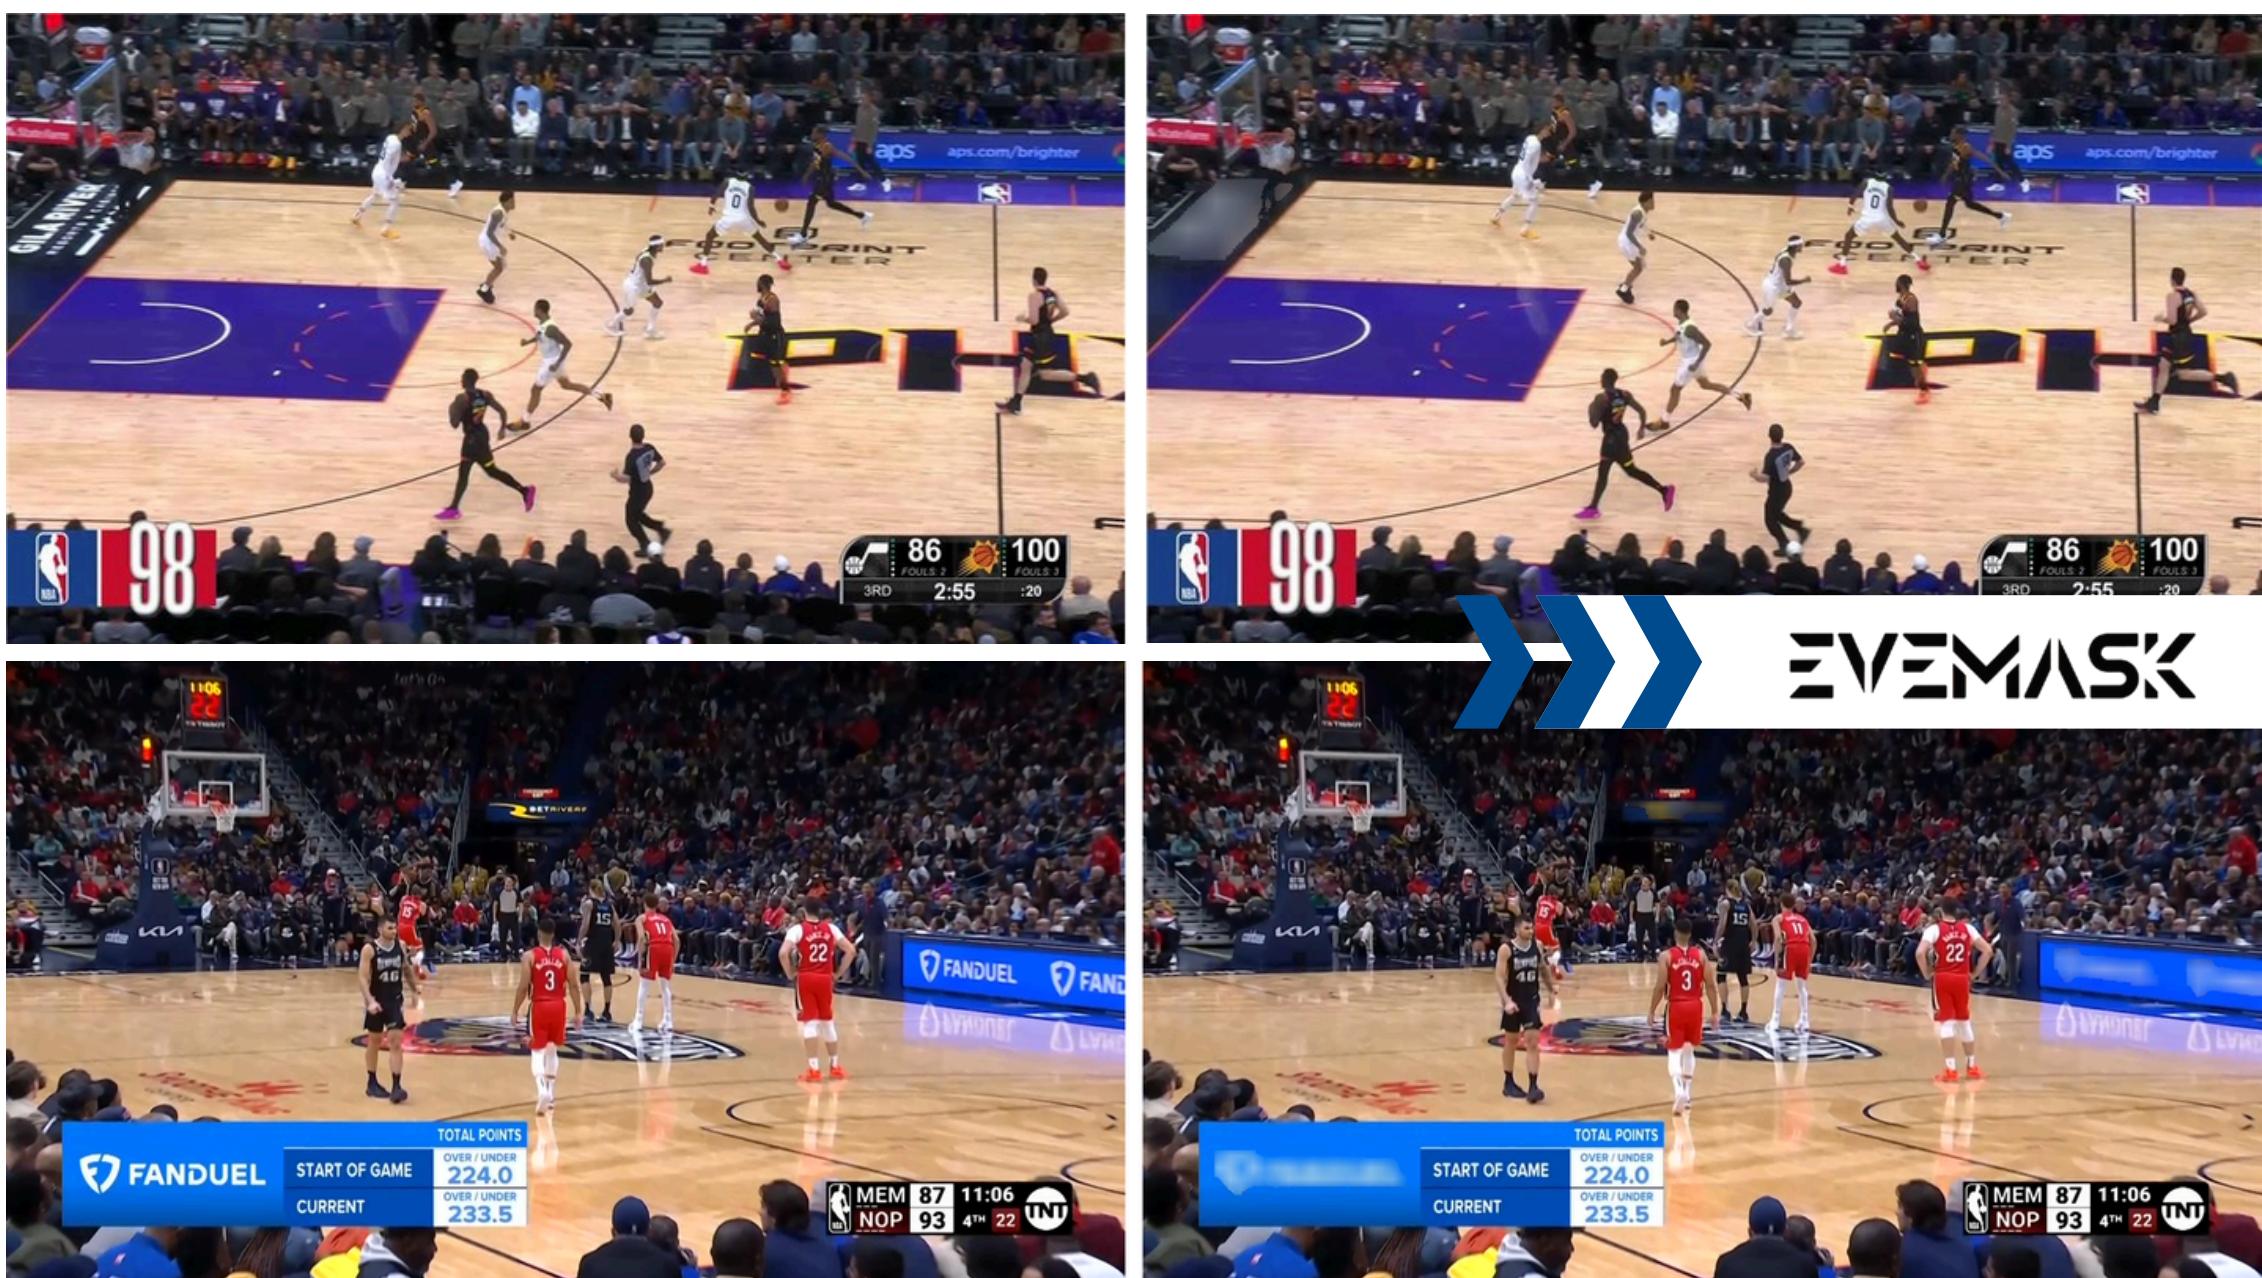

SOLUTION

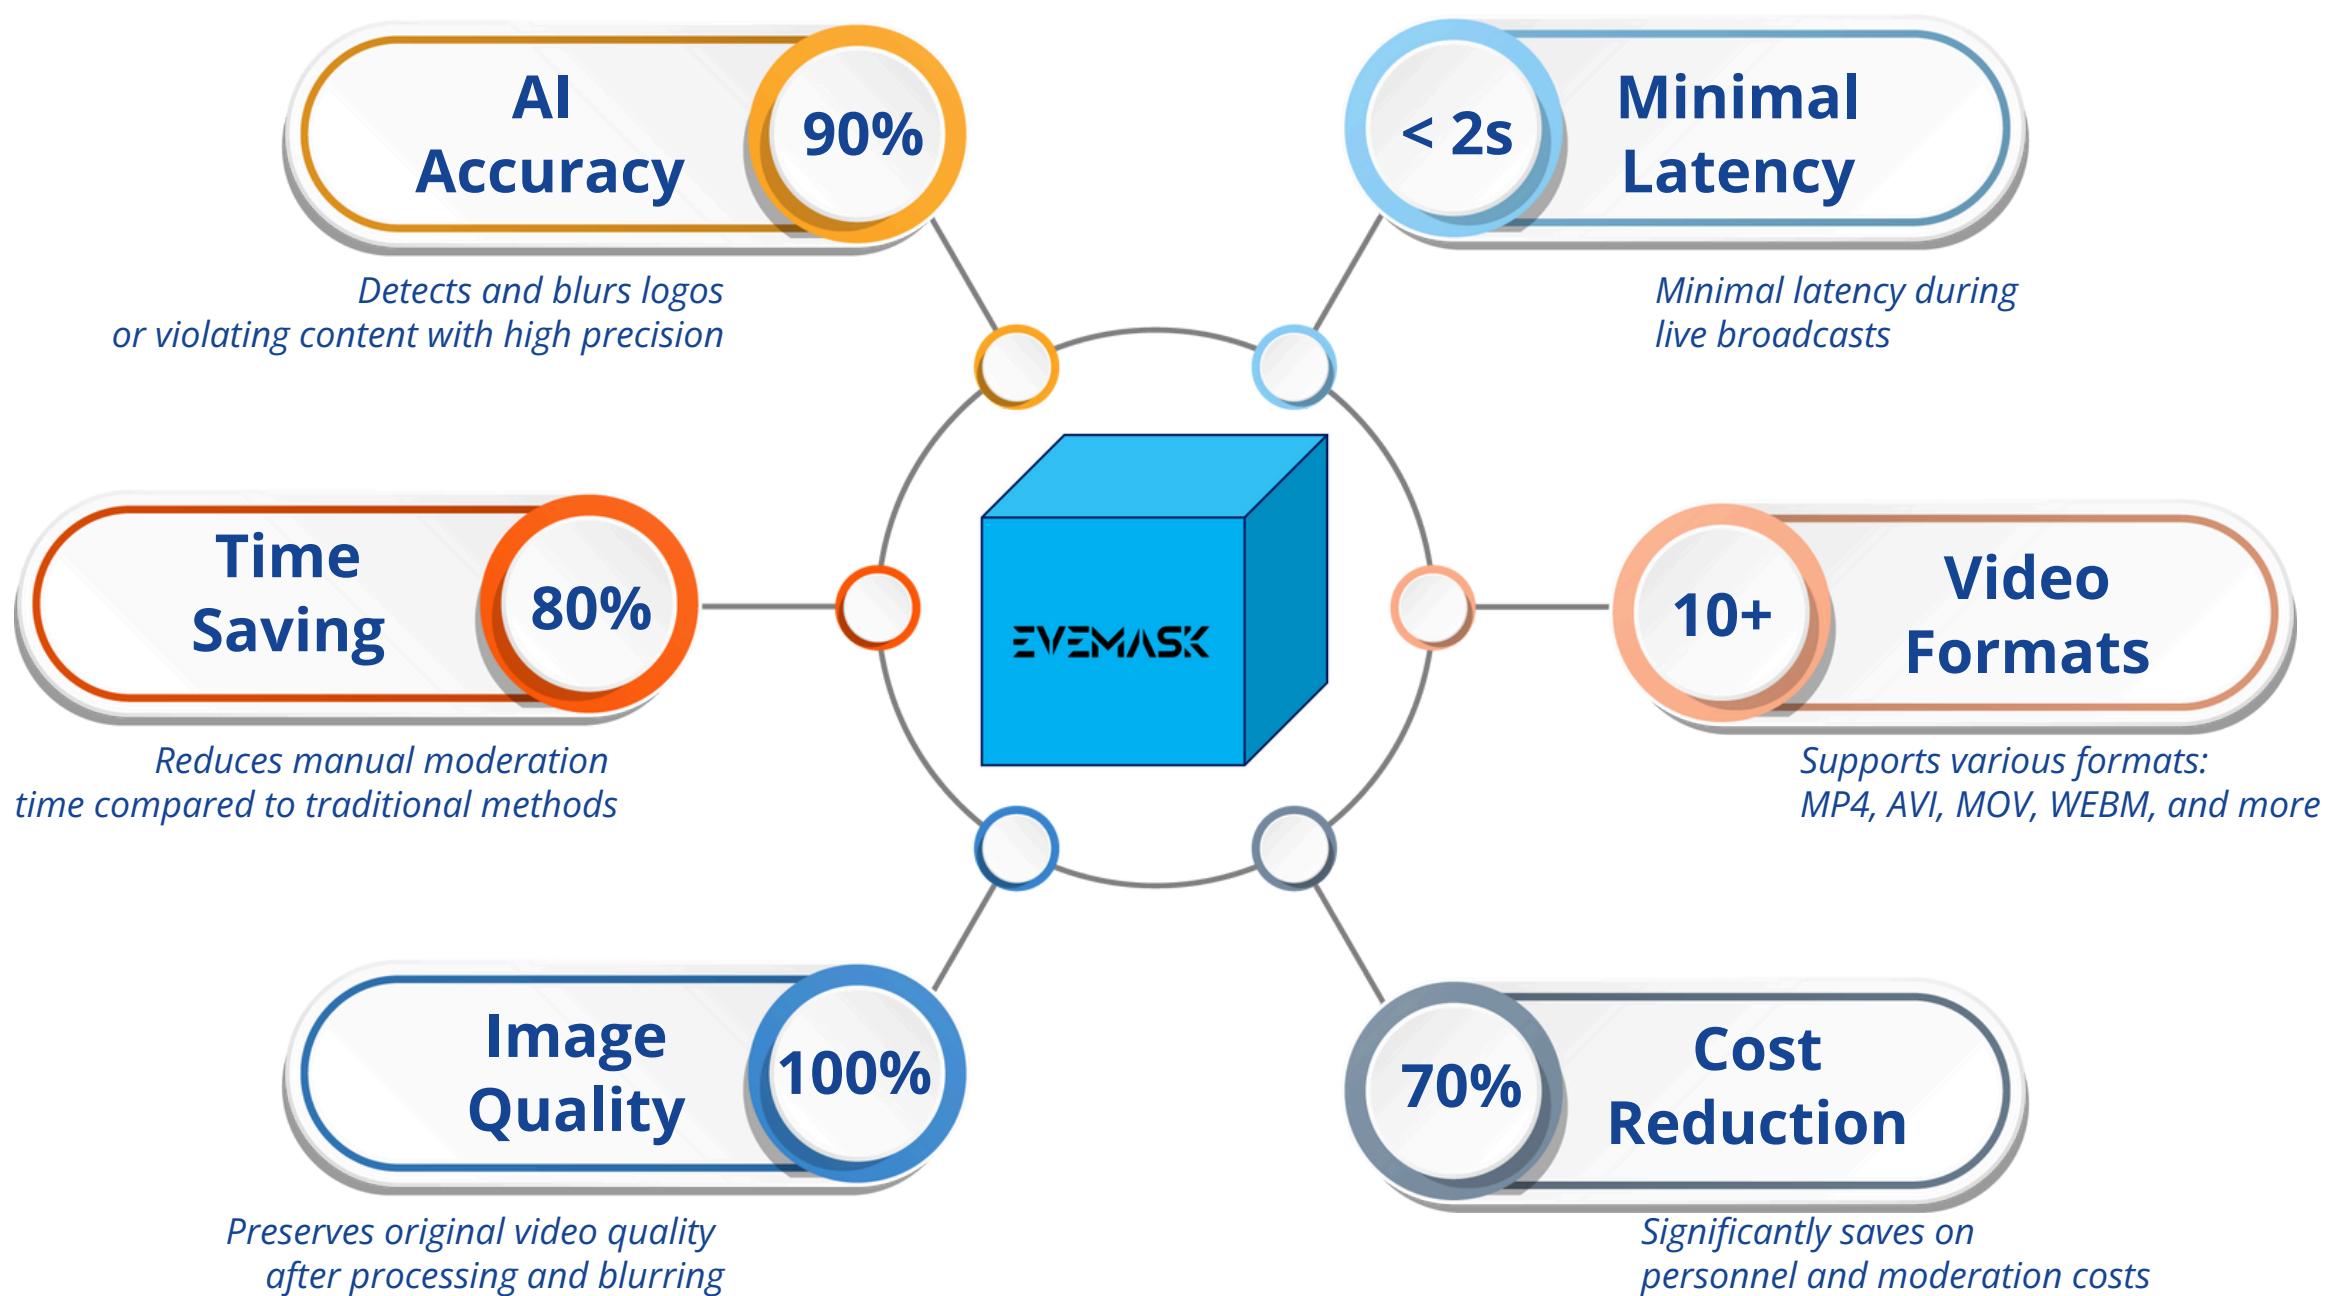

Evemask integrates directly into the signal transmission workflow, leveraging advanced AI to analyze and process content in real time. The system is capable of detecting and automatically masking inappropriate visuals, such as betting logos, ensuring that broadcast content complies with legal regulations.

Instead of relying on slow and inefficient manual censorship, Evemask offers a fully automated content control solution, helping broadcasters maintain image quality, preserve smooth transmission, and enhance the overall viewer experience.
